PESTICIDE REGISTRATION IN WASHINGTON

The **Washington State Department of Agriculture (WSDA)** is responsible for the registration of pesticides in Washington. Pesticides that require registration in Washington include (but are not limited to) all insecticides, herbicides, fungicides, rodenticides, nematocides, disinfectants, germicides, biocides, plant regulators, defoliants, desiccants and spray adjuvants. This includes minimum risk pesticides that are exempt from federal registration. Registration is not required for liquid chemical sterilant products labeled for use on critical or semi-critical medical devices, since these products are regulated by the Food and Drug Administration (FDA). Washington pesticide registration requirements are found in the Washington Pesticide Control Act (RCW 15.58.050 through 130), and the General Pesticide Rules (WAC 16-228-1400 through 1460).

FEDERAL PESTICIDE REGISTRATION

The Environmental Protection Agency (EPA) is responsible for federal pesticide registration. Federal pesticide registration requirements are found in the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), and the Code of Federal Regulations (40 CFR). In most cases, federal pesticide registration under Section 3 of FIFRA is required prior to pesticide registration in Washington. Federal registration is not required for Section 25(b) minimum risk pesticides or spray adjuvants. If you have general questions on federal pesticide registration procedures, you can contact one of the following individuals at the EPA (contact information is subject to change):

Pesticide type	Contact person	Phone number
Antimicrobial products	Yvette Hopkins	(703) 308-6214
Biological and biochemical products	Robert Torla	(703) 308-8098
Conventional pesticide products	Linda Arrington	(703) 305-5446

Pesticide registration information is available on the EPA web site at www.epa.gov/pesticides/chemreg.htm.

WSDA PESTICIDE REGISTRATION REQUIREMENTS

Section 3 Pesticides

Pesticides, plant regulators, defoliants and desiccants registered with the EPA under Section 3 of FIFRA must also be registered with WSDA prior to distribution in Washington. Products registered with WSDA must have a legal use in Washington. For example, a product labeled for use on citrus or cotton would not be registered by WSDA unless the label also included a crop grown in Washington. To register, submit an application for registration of pesticides (AGR 630-4216), 2 copies of the product label, 1 copy of the confidential statement of formula (CSF) and a \$145 registration fee for each product (\$290 / 2 years). In addition, submit a new product registration form (AGR 630-4250) if you are registering more than 4 new products. Material Safety Data Sheets (MSDS) are not required for registration of Section 3 pesticides. Some applications may require additional information. The submission of a completed 2(ee) review form (AGR 630-4323) is required for WSDA review of a 2(ee) use recommendation.

Section 25(b) Minimum Risk Pesticides

Minimum risk pesticides (e.g. citric acid, corn gluten, garlic, mint oil) that are exempt from federal registration under Section 25(b) of FIFRA must be registered with WSDA prior to distribution in Washington. To register, submit an application for registration of pesticides (AGR 630-4216), 2 copies of the product label, 1 copy of the MSDS, 1 copy of the CSF and a \$145 registration fee for each product (\$290 / 2 years). In addition, submit a new product registration form (AGR 630-4250) if you are registering more than 4 new products. Some applications may require additional information. Follow WSDA guidance for registration of 25(b) minimum risk pesticides.

Spray Adjuvants

Spray adjuvants are products that are used to increase the effectiveness of a pesticide (e.g. extenders, penetrants, spreaders, stickers, surfactants) or to modify the characteristics of the tank mix (e.g. acidifiers, defoaming agents, drift control agents). Adjuvants must be registered with WSDA prior to distribution in Washington. To register, submit an application for registration of pesticides (AGR 630-4216), a supplemental information form (AGR 630-4119), 2 copies of the product label, 1 copy of the MSDS, 1 copy of the CSF and a \$145 registration fee for each product (\$290 / 2 years). In addition, submit a new product registration form (AGR 630-4250) if you are registering more than 4 new products. WSDA strongly recommends submitting the CSF using the WSDA Spray Adjuvant Confidential Statement of Formula (AGR 630-4325). Some applications may require additional information. Follow WSDA guidance for registration of spray adjuvants.

Section 24(c) Special Local Need (SLN) Registration

WSDA has the authority under Section 24(c) of FIFRA to register an additional use of a federally registered pesticide on a food/feed crop for which a tolerance has been established (or on a non-food/non-feed crop or site) for use in a special local need situation. A special local need could include: new application method or timing, different rate, new crop, new pest, less hazardous formulation, prevention of pesticide resistance or application to a different soil type. Requests for SLN registrations are usually submitted by the product registrant, but can also be submitted by a "third party" (i.e. grower/user organization). Detailed documentation of the special local need is required to support an SLN registration. Follow WSDA guidance for submission of SLN registration requests. There is no fee to apply for an SLN registration, except that "stand-alone" SLN registrations require a \$145 registration fee for each product (\$290 / 2 years).

Section 18 Emergency Exemption from Registration

WSDA can request an emergency exemption from registration (Section 18 of FIFRA) from the EPA in order to allow the use of an unregistered pesticide in an emergency situation. An emergency situation could include: an outbreak of a new pest, development of resistance to existing pesticides, unusual weather conditions that caused a pest outbreak, or product cancellation. Requests for emergency exemptions are usually submitted by a commodity group or grower organization, and need to be supported by the product registrant. Detailed documentation of the emergency situation is required to support a request for an emergency exemption. Follow WSDA guidance for requesting emergency exemptions. There is no fee to apply for an emergency exemption.

Experimental Use Permit (EUP) / Aquatic EUP

An Experimental Use Permit is required for all experiments involving pesticides that are not federally registered, and for all experiments involving uses not allowed by the pesticide label. For terrestrial uses, submit a Washington State Experimental Use Permit form (AGR 4257) with all required documentation. For aquatic uses, submit an Application for Use of Experimental Pesticides on Aquatic Sites (AGR 4128) with all required documentation to WSDA and to Washington State Department of Ecology. There is no fee to apply for an EUP.

Information is Available from WSU on Pesticides Registered in Washington

Washington State University (WSU) maintains a database of pesticides registered in Washington on the Pesticide Information Center On-Line (PICOL) web site at picol.cahe.wsu.edu. PICOL users can query the registration database by crop, pest, active ingredient, or several other options. PICOL also has a tolerance database, a monthly newsletter and information on Section 24(c) registrations / Section 18 emergency exemptions.

WSDA Contact Information for Pesticide Registration

For information on pesticide registration contact the WSDA Pesticide Registration Section at (360) 902-2030 or e-mail pestreg@agr.wa.gov. The fax number is (360) 902-2093. Pesticide registration information and forms are available on the WSDA web site at www.wa.gov/agr/pmd/pesticides/forms.htm. Information on WSDA organic registration requirements is available at www.wa.gov/agr/fsah/organic/ofp.htm, or by contacting the WSDA Organic Food Program at (360) 902-1877.

Inquiries regarding the availability of this information in an alternative format should be directed to the WSDA Receptionist at (360) 902-1976, or Telecommunications Device for the Deaf (360) 902-1996.
